------------ Reports Module Missing In Admin-------------------

In Reports Module
- Basic Sample Reports
    1. Student admission details (batch-wise, Course, group-wise).
    2. Fee Details (Day-wise, course-wise, group-wise)
    3. Faculty Details
    4. Fee Due Reports
    5. …..

BUGS:

----------------------- Admin Profile -----------------------

Note:

This is not a course-based LMS. Our LMS is based on UG and PG learning models. Please keep this distinction in mind.

While creating a new user password is directly saving in db without encryption

While creating a new student password is automatically generated as **test.** make it generated as **Pass: username_1**

Dashboard:

● The dashboard is currently working as expected.

Departments:

● This module is also functioning correctly at the moment.

Courseware:

● The implemented courseware does **not** meet our expectations.

- Despite providing a reference structure, the output does **not align with the intended design** and **needs major revision**.

Users:

- The Users module is currently working fine.

Professors:

- Professors are **not being created** successfully.

Students:

- Students are being created successfully.

- However, due to issues in the Courseware module, students are **not being assigned to courses properly**.

Student Progress:

- After student creation, **names are not displayed**—only serial numbers are shown.

- Please update it to display: `Student Name (Serial Number)`.

Library:

- Book creation works fine.

- However, please **add an option to upload a PDF** for each book.
  If this is not feasible, consider removing this section entirely.

Notice Board:

- Notices are **not being created** successfully.

Inbox:

- When composing a message, the list shows professors even if **no professors exist in the Admin dashboard**.
  This needs to be dynamically updated based on available users.

--------------------- Instructor Profile -------------------------------

- Unable to test this module because **multiple professors are not being created** in the Admin panel.

---------------- Student Profile -------------------------------

Dashboard:

- "View Fee" and "View Support" pages are **not accessible** from the dashboard.

Courseware:

- Course assignment is working.

- However, we are expecting a **different format or layout** for the Courseware.

Assignment:

- Cannot test this module as the **Professor module is not functional**.

Question Bank:

- This module is working, but we **need more clarity** on its features and usage.

Fee Status:

- This section is currently **loading with an error**.

Final Request:

Please ensure that **all three roles (Admin, Instructor, Student)** support **Add / Update / Delete** operations for proper testing and validation.
 This will help us efficiently identify and report bugs throughout the application.
